WEB TECHNOLOGIES · LAB MID-TERM

Responsive Website Screenshot Report

Screenshot template for documenting the responsive e-commerce website and mid-term tasks.

Student name	Fazal Abbas
Registration number	FA24-BCS-127
Project	Native Union-inspired e-commerce website
Course	Web Technologies
Personal breakpoint	627px
Accent colour	hsl(189, 70%, 45%)

PERSONAL EXAM VALUES

N	27
BP	600 + 27 = 627px
H	(27 × 7) mod 360 = 189°
K	(27 mod 3) + 3 = 3 categories
Sticky offset	(27 mod 40) + 70 = 97px
Premium threshold	27 × 100 = Rs. 2,700

How to use this document

Replace each dashed placeholder with the matching browser screenshot. In Word, select the placeholder area, use Insert > Pictures, then resize and position the image within the space. Keep the viewport width visible in each screenshot or caption. When finished, export this document as PDF if required.

Required responsive widths

Mobile: 375px | Exact breakpoint: 627px | Desktop: 1280px

TASK 1 | BROWSER SCREENSHOTS

CSS-only Category Filter

Capture the product listing with the category filter visible. Show the selected filter and the matching product cards at each viewport width.

Screenshot 1.1 — Mobile (375px) All or a selected category

Screenshot 1.2 — Breakpoint (627px) Filter controls and product grid

Screenshot 1.3 — Desktop (1280px) Selected category and filtered cards

TASK 2 | BROWSER SCREENSHOTS

COMPLETION NOTES

Implementation and Evidence Notes

Use this page to record any final details about the screenshots and implementation before exporting the report.

Task 1	CSS-only filtering using radio buttons and CSS selectors.
Task 2	Named CSS Grid areas and sticky product details.
Task 3	Vanilla JavaScript search, sorting and Premium labels.
JavaScript threshold	Premium when price is greater than Rs. 2,700.
Sticky position	97px from the top of the viewport.

Final review

Check that all screenshots are readable, that the browser width is shown or captioned correctly, and that the captured results match the submitted code. Include the relevant HTML, CSS and JavaScript code in the final submission PDF if your exam instructions require it.
